Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. 5,959,005 to Hartmann et al.

Hartmann et al disclose silanized silica produced by a process comprising:

- 1) Spraying silica under intensive mixing with water or dilute acid.
- 2) Spraying with a surface modifying agent.
- 3) Tempering at temperatures of 100 to 400 deg. C for 1-6 hours.
- 4) Destucturing/compressing and grinding.

The silicas produced possess physico/chemical properties at least greatly overlapping those claimed instantly.

These silicas are taught as useful for a variety of applications including paints wherein a binder vehicle would inherently be present.

Therefore, the reference anticipates the instant claims.
